THE X-RAY 1964

Medical College of Virginia
Richmond, Virginia
We're through with our work—the picture-taking, and cutting, and pasting, and typing, and meeting deadlines—and your work is just beginning. You must make these pictures and words into memories. You must add your own feelings to each of them—the sound and smell and emotion that we couldn't put in, because we are not you. If you do, you will have a treasure; a record of your year experienced and remembered.

What Is M.C.V.?

First, it is a place . . .
something statistically big . . .

. . . and humanly small.
The uninitiated find it bewildering, but we have learned to see it with familiarity. Seeing it thus, MCV often means to us not the whole—but the smaller things that make up the whole. It is books . . . and instruments . . . and medicines . . . and lighted windows . . . and halls . . . and blackboards. It is a beacon which begins and ends the night. It is the very old and the very new. It is brick and glass and paper and linen . . . and a few trees. This is a place of which to be proud. It is a beautiful goal in an ugly setting.
MCV is activity. It is morning, when alarms ring, and water gushes, and elevators are packed with the changing shift. It is a whole day and night, sunrise and sunset of activity.
It is noise . . . from the tiniest to the greatest. Hands and heads and feet are busy . . . machines are busy . . . there are busy groups and busy individuals. This is a world where phones ring, Telepage calls, sterilizers boil, wheels roll. It is at times a very basic world of hunger and food; weariness and rest.
Healing, searching, comforting, learning . . . in these few blocks the movement never stops. Life begins, life ends, and life goes on.
MCV is living with other people. This is the strongest tie we have to this school during the years we are here. Older friends at home and at other schools are remembered, and yet these are the real friends now, these people who know, along with us, what life at MCV is like. All other people are, somehow, not quite in touch.
These are the people who sit sleepily with you on winter mornings, before the sun comes up, while you eat breakfast. These are the people who understand all the private jokes, and laugh like crazy when you do something stupid because they did the same thing last week.
MCV is preparation, built around a hub of teaching and learning. Doctors, dentists, nurses, pharmacists, medical technologists, physical therapists, hospital administrators, scientists . . . but first we are students, and studying is our occupation.
We study the living and the dead; the written and the unwritten. We study cases real and hypothetical. We discover the miracles in the test tube and Petri dish; of the human body and the human mind. We know a thousand things and must learn a million more. We watch . . . we memorize . . . we reason. When solitude is a must to study, we find it, or make it, everywhere. Sprawling, sitting, lying, standing, leaning; we study.
MCV is good times. It is a carnival of things that are meant to be fun: partying, dancing, picnicking, giving shows; and a merry-go-round of spontaneous things that turn out to be fun: something said in class, a midnight romp, a coke at the Skull. Our good times occur naturally, while we are eating or walking to class. They are made up of little things, like a moment with a friend. Laughter punctuates our daily lives, and adds its own rich meaning.
MCV is work, for by doing we learn. We go beyond the classrooms and the labs . . . into the silent emptiness of the pharmacy at night and the busy warmth of the kitchens at mealtime; into the wards and the operating rooms, and the physical therapy gym. We meet the patients — real people who cannot be found on page 109 of a text, and we bathe them, feed them, stick needles in them, exercise them, teach them, and listen to them. We know how it feels to be weary at the end of the day, and we know well the half-anger, half-worry that comes when something has gone wrong. But, we also know, from a hundred incidences throughout the day, the satisfaction that our type of work can give.
MCV is many feelings. Underlying everything there is excitement. MCV can be as exasperating as a genetics problem and as much fun as Saturday night. It is many things too big for us to ever know, things more complicated and wonderful than we had ever guessed. It is the tense nervousness before an exam, and the even colder fear the patient knows. It is the quiet joy of first wearing a white cap, or the tremendous relief when you find out you passed. MCV is well acquainted with pain. It is grief. It is comfort. More than all this—for the patients, and families, and doctors, and teachers, and students—it is hope.

“Teach us to care and not to care.” T. S. Eliot
Often we forget why we came. For each of us there had to be some vision, some dream — perhaps silly, perhaps grim — that brought us here. The dream was rather vague and shadowy except for you — me — the important central figure in white. But visions vanish when reality steps in. And now the sidewalks are real, the elevators, the tunnels, the cafeteria lines, the people. Metal hospital beds that shock you on cold mornings are real. Bloody syringes in a basin are real. A patient says nothing, but his eyes see everything. Stophene stings. A clean dressing looks whitely fresh. Rubber gloves feel smooth as your hands slip into them; the cuff pops against your wrist; the powder flies for an instant. You touch reality. You feel it, and smell it, and see it, and hear it.
Life at MCV is reality.
Perhaps that is better than the dream.
Administration
Robert Blackwell Smith, Jr., Ph.D.
President
To our 1964 Graduates:

A bronze plaque in the foyer of the MCV hospital is inscribed:

"TO PRESERVE AND RESTORE HEALTH - TO SEEK THE CAUSE AND CURE OF DISEASES - TO EDUCATE THOSE WHO WOULD SERVE HUMANITY."

This brief statement expresses the purpose of the institution and the goal that we continuously seek to attain. The completion of your formal education is your attainment of the first of many goals that will challenge you during the remainder of your professional careers. The application of the knowledge you have acquired at MCV will launch you on your search for additional goals, greater achievement and service to humanity.

Many who have gone before you during past years are now carrying on their search and welcome you to their ranks. The College is proud of its graduates, and we are confident that the contributions of the class of 1964 will be in the highest traditions of our alumni who continue, "To preserve and restore health - to seek the cause and cure of diseases - and to serve humanity."

Congratulations and best wishes,

Sincerely,

R. Blackwell Smith, Jr.

The Board of Visitors

The Board of Visitors has had a long and interesting history. The Medical College of Virginia began in 1838, as the Medical Department of Hampden-Sydney College.

In 1854, a misunderstanding arose over the appointment of a professor to a new chair. For the first time, Hampden-Sydney College did not approve the recommendation of the medical faculty and approved another man for the chair. A long drawn out controversy ensued, and the medical department petitioned the General Assembly of Virginia for a separate charter, which was granted February 25, 1854. At that time the governor appointed the first Board of Visitors, nineteen men.

In 1882, Governor William S. Cameron decided he would remove the members of the old board and appointed an entirely new board. When the new board came to the college for a meeting, Dr. James B. McCall, Dean, locked the college doors (Egyptian Building) and refused them admittance. The board met in the yard. The issue was finally resolved by the Supreme Court of Appeals, which ruled that while the governor had the authority to appoint, only the General Assembly itself could remove board members.

The College ran for 90 years before it was discovered that lifetime appointments to the board were unconstitutional. Today, board members are appointed for four year terms. If separated by one year, members may serve more than one four year term. In many instances, fathers and sons have served on the board. These are only a few of the many interesting happenings which have brought the Board of Visitors to their present existence.

Elizabeth Cowan Morrow, Assistant Dean of Students, says that her particular interest is in trying to establish several common meeting grounds to unite students of the various schools of MCV.

A native of North Carolina, and a graduate of Queens College and Columbia University, Miss Morrow has held positions in personnel and guidance at Winthrop College, Duke University, State University of New York, and the College of William and Mary. Her work at MCV offers a “different type of job” which she likes very much. Miss Morrow came to MCV as Assistant Dean of Students in September, 1963.

Mr. Charles W. Hill, Student Financial Aid Officer, is in charge of the administration of student loans and scholarships, and counseling students in financial matters. Formerly with Southern Bank and Trust Company in Richmond, Mr. Hill states that he has always been interested in education, and was glad for the opportunity to combine his financial background with his interest in education.

Our Director of Housing is Harry R. Hester, a graduate of Emory and Henry College. Mr. Hester is in charge of all student housing. This includes married housing, room rentals, student parking, housekeeping, disciplining, planning, and renovating, and all room assignments. In addition to this, Mr. Hester is also handling the intramural activities for this year.
Student Health

The Medical College of Virginia has a full-time health service for all its students. Coverage begins with matriculation and is continuous throughout the year until graduation or withdrawal. The Student Health Service includes a physician, Dr. William Kay, and a nurse, Miss E. West, who are available for treatment, conference, and guidance relative to health and adjustment problems.

The Student Health office is located on the Fourth Floor, East Wing, of MCV Hospital.

MCV Student Council

Archie Beebe, President. Claude Whitehead, Vice-president. Virginia Robbins, Secretary.
Representatives

The Student Council

The Medical College of Virginia Student Council is composed of representatives of each class of each school, who are elected by the members of their respective classes. The number of representatives each class is allotted is determined by class membership.

Officers of the Student Council are elected from the presidents of the various schools by the members of the Student Council.

The Student Council has had a very active and successful year. Orientation was sponsored by the Student Council. The Social Committee held three major events this year. The Tour Committee helped with orientation and served as a student link with the public. The Bridge and Inter-Faith Committees were newly active groups on campus. The X-Ray expanded, giving a more complete coverage to student life.

The Student Body Officers, members of the Student Council, and Committee Chairmen have worked diligently to make this year a success.
Freshman Orientation

Orientation week for students was a cooperative effort by the Dean of Student's office, the administration, student government, and all the schools. This year emphasis was placed on activities for first year students in an effort to give them an effective introduction to MCV. A tour of the college was planned and conducted by the Tour Committee on the first afternoon of orientation week. That evening, Dr. R. Blackwell Smith, President of the College, extended greetings, and introduced the Administrative Council. After this, the President of Student Government, Archie Beebe, introduced officers of the Student Council and gave a brief explanation of the Student Council. Chairman of the Honor Council, Claude Whitehead, explained the honor code and answered questions.

The second day of orientation was consumed entirely with registration. That evening the Interfaith Committee sponsored a service at Monumental Church.

The third and last day of orientation, chartered buses were boarded to take freshmen to Camp Kentwood. At the picnic students were able to relax and enjoy baseball, football, and dancing to an excellent combo provided through the generosity of the Alumni Association.
Registration

Organized confusion.
May I initial your paper... Four dollars, please... Do you have a car? Do you live on campus? Have you had your picture taken yet?... Celebrity series? Virginia Museum? Richmond Symphony? Chest x-ray: Take a deep breath. Hold it! Thank you. Next... Go back and have Mr. Hester initial under Housing... Yes, that is all. Have you had your picture taken for the yearbook? Between those doors or up the stairs. Name? School address? Take this to the photographer to your right...

Chin up. Smile. That's all. Next. Have you signed out with Mr. Hill? You're through.
This was registration.
Tour Committee

The Tour Committee began the school year by conducting tours for all new students during orientation. In November, the Tour Committee assisted with weekend activities planned for high school guidance counselors. In the spring, high school students interested in Medicine and its related professions were invited to visit MCV. Members of the Tour Committee planned and directed the events of the day. This not only enabled interested students to learn of the resources available at MCV, but also to receive first-hand information from students. This has proved to be one of the greatest advantages of having a Tour Committee.

Co-Chairmen Paul White and Virginia Robbins
The instructor calls out what should be in each hand during the Beginners class.

Bridge Committee

Noting the interest in Bridge on Campus, the Student Council set up a committee to hire a professional instructor to teach classes in Advanced and Beginning Bridge. Classes were free if each class had more than forty members. There was an enthusiastic turnout for the classes.
Mel Merchant, Chairman of the Social Committee, dances with Lana Waite at the Christmas Dance.

Dean Bacon, Assistant Dean Morrow, Mrs. Bacon and Mel Merchant chat at the Christmas Dance.

Couples dance to the music of the Tantilla Band at the Christmas Dance.
The Social Committee

The Social Committee, headed by Mel Merchant and composed of representatives of every class from every school, sponsored three major events this year. The All School Christmas Dance was held at Tantilla Gardens early in December. Committee members held their breath waiting to see if attendance would exceed what fire regulations allowed. But, all went well and the dance was a big success. The Jazz-Folk Festival held in the Student Union Building in January was also a success. Hopefully it was the beginning of yearly concerts on campus. In the Spring there was another dance for the entire school in honor of the seniors. The Social Committee enjoyed a very successful year.

(Top) Billy Butterfield and his group opened the show.

The Near Eastern Ensemble introduced the electric oud and Princess Jamal.

(Linda Vickers captivated the audience with her folk songs at the Jazz-Folk Festival.

(Bottom) The faculty and administration seem delighted with the turn-out for the Jazz-Folk Festival.
Cultural Opportunities

Students at MCV are given many opportunities to attend Richmond presentations of visiting and local artists in the fields of the Dance, Music, Theatre, and Art. The Student Government finances one half the cost of season tickets to either The Virginia Museum, the Celebrity Series or the Richmond Symphony.

Among the artists presented at the Mosque by the Richmond symphony this season were violinist Erica Morini, pianist John Browning, and the Richmond Woodwind Quintet.

The very popular Celebrity Series offers a fascinating combination of artists throughout the season, from October to April. The 1963-1964 program included presentations by The American Ballet Theatre, Boston Pops Orchestra conducted by Arthur Fiedler, the Koutev Bulgarian National Ensemble, Montavoni, Eugene Ormandy and the Philadelphia Orchestra, and

The Celebrity Series presented pianist Philippe Entremont.
pianist Philippe Entremont.

The Virginia Museum of Fine Arts introduced many groups of artists to Richmond theatre-goers. The Virginia Dance Society presented stirring recitals by several ensembles, including Mata and Hari, Norman Walker and Company, and Ruth Currier and Company. The Museum Theatre, presenting nationally famous plays, began the 1963-1964 season with their production of the ever-popular The King and I, and followed it with presentations of All The Way Home, Hamlet, A Thousand Clowns, and Auntie Mame. Programs by the Virginia Film Society and the Virginia Chamber Music Society are also available to MCV students throughout the year.

Robert Albertia plays the King and Marjorie Arenstein, Anna, in the Virginia Museum Theatre's production of The King and I.

Ismael Nazario, who plays Lun Tha, listens as the King's courtesan Tuptim, played by Caroline Payne, sings of her love for him. The two appeared in The King and I.

The Koutev Bulgarian National Ensemble presented by the Celebrity Series.
Visiting Scholars Committee

Late comers rush in to the meeting.

Anthony Yuskaitis, Chairman of the Visiting Scholars Committee, introduces the speaker.

The Visiting Scholars Committee, composed of interested students from every school, faculty members, and members of the administration, bring authors, scholars, politicians, religious leaders, business tycoons, and a variety of other speakers to MCV to enrich our cultural opportunities here on campus.
The Honor Council

Ever since man has had a society, he has made certain laws and mores for his society to follow. The same is true of our Honor System at the Medical College of Virginia. The Honor System is a system of self-government whereby the students, themselves, eliminate from the Student Body those students who do not uphold and follow our Honor Code.

The Honor Council is composed of a member from each of the classes at MCV who has been elected by his fellow classmates. It is the duty of the Honor Council Members to decide if there has been an Honor Code violation, and, if so, to set the penalty for the particular infraction. It is not easy to judge other people; however, the members of the Honor Council realize the importance of their job and perform their duty diligently.

It is of utmost importance also, for each student to realize his duty as a member of the Student Body and as a part of the Honor System. Without the cooperation of each student, there would be no Honor System, for each student is a basic part of our Honor System.

CLAUDE WHITEHEAD
The School Officers

(Left to right) William Avery Webb, secretary-treasurer; Claude Whitehead, president. The School of Dentistry.

(Left to right) Martha Dickerson, vice-president; Carolyn Gwin, treasurer; Virginia Robbins, president; Anna Alligood, secretary. The School of Nursing.

(Left to right) Donna Boyd, secretary-treasurer; Howard Aulick, president. The School of Physical Therapy.
Each school at the Medical College elects officers of their own Student Body to serve them. Some schools have a Student Council of their own to organize and plan the activities for their school.

Besides their responsibilities to their individual schools, school presidents are ex-officio members of the Medical College Student Council and members of the Tour Committee.

Paul White, president. School of Medicine. Missing: John McAllister, secretary-treasurer.

(Left to right) Laura Neale, secretary-treasurer; Herman Medlin, president. School of Pharmacy.
The X-Ray

Walter Padow, Co-editor.

It all started in June a year ago. We were going to have the best annual ever. The sweltering days of summer turned into the brisk days of fall and the first deadline rolled by with nary a copy sheet on its way to Dallas. With the arrival of cold weather, THE X-RAY moved to Randolph-Minor Fourth Floor Lounge, since there was a decided lack of heat in the office provided. In warmth and comfort we still vowed it would be the best annual in MCV's history. Thanks to a great deal of sweat and backaches on Gail Silcox port, we finally met . . . all right — almost met . . . a deadline. And now, as we approach the finish line, we cross our fingers and say: Well, it's better than last years . . . isn't it?

Faye Durette, Business Manager
Our staff lacks something... Members of the opposite...
The Beacon

The editor of The Beacon is elected by the nursing students during the first month of the spring quarter of the school year. Her duties are to: 1) keep a record of amendments of the Constitution and Bylaws, 2) keep a record for revision of The Beacon, 3) be responsible for the publication of The Beacon each year. The Beacon editor selects her committee who works with her and the Assistant Dean of Students to plan The Beacon for the following year.

The Beacon is the handbook for the School of Nursing and all those who live in Randolph-Minor Hall.
The Alumni Association

For many students at the Medical College of Virginia, June, 1964, will mark the realization of their dreams. Doctors, dentists, pharmacists, nurses, physical therapists, hospital administrators, and recipients of Ph.D. and M.A. degrees, The Alumni Association of the Medical College of Virginia congratulates you, the graduates of 1964, and extends to you a warm welcome into their midst.

MCV prepares us for professional leadership. Archie Beebe discusses a problem with members of the Student Council.

MCV prepares us to be well-informed members of our chosen profession. Robert Wampler studies in the Library.
The Student American Medical Association

The Medical College of Virginia Chapter of SAMA came into existence in December, 1952, and has since that time become the prominent medical organization on the campus. Each year SAMA presents lectures on topics of interest to the entire medical school, as well as presenting various films to the individual classes.

SAMA membership is open to all medical students, interns, and residents, of which approximately 60 percent of the school of medicine is represented. The Medical College of Virginia Chapter is composed of an Advisory Council and an Executive Council, as well as four representatives of each class. The Advisory Council to SAMA consists of the Dean of the school of medicine or his appointed representative, two faculty representatives, and a local medical society representative. The Executive Council is composed of the Dean of the school of medicine or his appointed representative and the President, Vice-President, Secretary, and Treasurer of SAMA at the Medical College of Virginia. The officers are elected at an annual meeting of the membership in May of each year, and at that time four students from each class are elected as representatives to SAMA.

It is through each member and their efforts that SAMA at the Medical College of Virginia has had the opportunity to speak up and speak out for medicine, to look up and look out for medicine, and to stand up and stand out for medicine. For SAMA believes that cooperation, enthusiasm and hard work, combined with mature and realistic thinking, will preserve the honor and esteem of the medical profession.
Fred Ridenhour, secretary-treasurer; John Timmerman, vice-president, Philip Brandt, president.

Student Dental Society

The Student Dental Society at the Medical College of Virginia serves quite a useful and functional purpose. Membership is offered to every student in the School of Dentistry. The Medical College of Virginia Chapter's Executive Committee is comprised of two representatives and the officers from each of the four classes.

The Society serves to tie together the various groups in the Dental School by a bond of social and professional interests, in the form of round-table discussions, speakers, presentations of papers by its members, and other events. In the past, the Society has sponsored occasional picnics and an annual "Faculty Take-Off!"

The two main objectives of the Society are the promotion of scholarship and professionalism among its members. The Society makes available a Student Loan Fund for any student who is in need of financial assistance during the year.

(left) Underclassmen work in labs.
Virginia Pharmaceutical Association

The Virginia Pharmaceutical Association's main purpose is to improve public health by promoting high standards of professional practice. It carries out programs essential for the student's professional future.

Meetings and discussions, led by professional men from all fields, are held to help prepare the Pharmacy students of MCV for the moral, ethical, and social obligation as citizens and as members of the Pharmaceutical profession.

Basically, the Student Branch of the V.Ph. A. unites the students of Pharmacy, so that through participation and observation, they will develop pharmaceutical talent and elevate the standard of professional thought.

American Pharmaceutical Association

The A.Ph. A. was fortunate this year in having our president Michael Stredler elected delegate to the House of Delegates of the student section of the American Pharmaceutical Association at its annual convention at Miami Beach this summer. At the beginning of the year, a successful membership drive in which the junior and senior classes attained 100% membership, was held. All phases of the Pharmacy profession were presented at the monthly meetings. Each program was planned to benefit each member of the organization by increasing his knowledge and understanding of his role as a future pharmacist.
MCV representatives at the State S.N.A.V. Convention in Richmond. (left to right) Jane White, junior rep.; Ruth Johnson, MCV rep.; Sue Triplett, sophomore rep.; Charlotte Arnold, senior rep.

Student Nurses Association

District III Student Nurses Association plays a definite role in the life of a nursing student at MCV. It prepares her for membership in the A.N.A. and gives a better understanding of the professional organization.

District plans for the year included the State and National Conventions, a Christmas Party, a Talent Show, discussions, speakers, and elections. Meetings were held once a month throughout the school year, and rotated with a different school host each month.

Ruth Johnson and another Virginia Delegate at the National Convention in Atlantic City, N. J.
Intramural Sports

After several false starts, the Intramural Sports Program finally got into full swing after Christmas. Several basketball games were held each week in the John Marshall High School gym. And, other sports activities are scheduled for the spring months.

Stan Toporek is Chairman of the MCV Athletic Council. Each class of each school elects a representative to this council.
For the first time at MCV an Inter-Faith Committee, composed of members from the various schools representing Protestant, Jewish, and Catholic faiths, was appointed by the president of the Student Council in the summer of 1963. Judy Allen was appointed chairman.

The committee has discussed the religious activities at MCV which are open to all students. Campus Vespers are held every Wednesday evening from 6:30 p.m. to 7:00 p.m. At this service, clergy from the different Faiths and denominations represented at MCV speak. There are, also, many denominational fellowships active on campus.

Sigma Zeta Honorary Science Fraternity was founded at Shurtleff College in Alton, Illinois in October, 1925, by three science professors, Elmer E. List, J. Ellis Powell, and Ralph K. Carleton. Their intention was to provide a local society for the recognition of outstanding science and mathematics students. However, the organization captured the attention of neighboring schools and at the first conclave held in Alton, the national character of Sigma Zeta was formally announced. MCV received the charter for the formation of its Gamma chapter the following year and the official gavel of the national organization contains in it a piece of the flooring from the Egyptian Building. Since its inception, Sigma Zeta has grown and is presently represented in 21 colleges and universities throughout the country. Its purpose today is to encourage and foster the attainment of a knowledge of the sciences and to recognize in its membership the attainment of high scholarship in this field.

Alpha-Omega-Alpha

The Alpha Omega Alpha medical fraternity was organized by William W. Root at the College of Medicine, University of Illinois on August 25, 1902. The name was changed to Alpha Omega Alpha Honorary Medical Society by action of the Biennial Council June 14, 1934. The Beta Chapter of Virginia, known as the Brown Sequard Chapter, was organized at the Medical College of Virginia in 1940, under the counselship of Dr. William B. Porter.

The Society composes three classes of members: 1) Undergraduate membership based entirely on scholarship, personal honesty and potential leadership; 2) Alumni and faculty membership granted for distinctive achievements in the art and practice of scientific medicine and 3) Honorary membership awarded to eminent leaders in medicine and the allied sciences.

The motto of the Society is: "TO BE WORTHY TO SERVE THE SUFFERING."

The spirit of the Society is set forth in its motto and in a modern interpretation of the Hippocratic Oath. It is the duty of members to promote its ideals, to foster scientific and philosophical features of the medical profession, to look beyond self to the welfare of the profession and of the public, to cultivate social mindedness as well as an individualistic attitude toward responsibilities, to show respect for colleagues and especially for elders and teachers, to foster research and in all ways to ennoble the profession of medicine and advance it in public opinion. It is equally a duty to avoid what is unworthy, including the commercial spirit and all practices injurious to the welfare of patients, the public, or the profession.

On December 6, 1963, the annual banquet and induction was held at the John Marshall Hotel preceded by a scientific gathering at George Ben Johnson Auditorium. Dr. William Parson, Professor and Chairman of the Department of Internal Medicine at the University of Virginia School of Medicine, spoke on "Current Concepts of Obesity." This was followed by the induction of undergraduate, alumni, and faculty members. Dr. William Parson and Drs. Kinloch Nelson and Peter N. Pastore from the Medical College of Virginia were the honored inductees.
The officers have a meeting.
Alpha Sigma Chi is an honorary leadership society organized to serve the college and student body, and to grant recognition to those students who try meeting high standards of leadership, scholarship, and character, have demonstrated ability and willingness to play prominent roles in carrying on student activities.

Members are selected from the school of Medicine, Dentistry, Nursing, and Pharmacy. An honorary member is chosen annually from among the faculty.

Alpha Sigma Chi has existed at MCV since 1938, and purports to provide for the school an organization of highest ideals and standards, and to create a spirit of fellowship and cooperation among students in the four schools.

Alpha Sigma Chi Pledges
The local AKK Chapter was chartered here at MCV in 1906, and since that time has been a dynamic and functioning organization with respect to its activities. For the last five years, the Fraternity has attained unprecedented popularity as a result of the concerted efforts of many individuals — the Officers, the active Brothers, and the Alumni Association. Our total membership is 115 including the 32 pledges of our Fall 1963 Rush Program with the wives of 49 of members participating in the Wives Club. It is to Ruth “Sigsby” Gayle, President of the AKK Wives Club, that many thanks are extended from all the Brothers for the fine work that she and her committees are doing. Their activities range from teas, bridge parties, local tours and home demonstration to assisting destitute families for Christmas.

From a summer of leisure, the AKK Brothers of MCV were again forced into making the painful transition from an eight hour day of work to an eighteen hour day. In spite of inadequate time, but filled with enthusiasm, Alpha Kappa Kappa embarked upon an ambitious program for the year’s activities.

The greatest amount of time has centered about the Freshman Rushing Program for the Fall, which includes a variety of social functions. At the end of their first week of Medical School the Freshmen were treated to their first AKK Combo Party at the Bon Air Community Center. It was a gala affair with raucous music and many headaches the next day. Only three weeks of school had passed for the Freshmen and “wham,” the proverbial “panic” button had been pushed. To release the button, if only momentarily, the Freshmen were front row occupiers at a World Series Party at the Pool Cabana of an alumnus, Dr. Philip Coleman. That afternoon was essentially complete with beer, chips, many TV sets and those championship Dodgers.

The next three weeks were traumatic for most of the Brothers and especially the Freshmen for exams seemed to be an everyday headache. In order to get everyone out of their hermit-like existence and further our Rush Program the AKK Brothers took over Schroft’s Virginia Inn for a Combo Party. Our last Rush function, a Dance Party, in the “plush” Marshall Room of the John Marshall Hotel, was an astonishing success in that the attendance was overwhelming and the “true fraternal spirit prevailed.”

Since last year, a number of the Brothers have fallen from the throne of bachelorhood. They are: Ray Young, Gary Wake, Skip Caudill, Frank Ferrier, John Flournoy, Bill Gayle, and Greg Halloran. The diaper count has remained low, with one offspring born to Fred and Rose Shaia, but the count shows signs of increasing with Jerry and Emily Miller in December and Bob and Vere Beatley in March—there went that $600 deduction for 1963!

In closing three other Brothers should be cited for their outstanding contributions and efforts during the school year ’63-’64. They include Ernie Kolendrianos, our President, Randolph Halloran, our Treasurer and Joe Jacumin, Corresponding Secretary.

Phi Delta Epsilon

Phi Delta Epsilon was founded at Cornell University Medical College in 1904. It is the aim of Phi D.E. to blend the following components of a happy and successful medical career: high scientific and educational standards, good fellowship at undergraduate, house staff and graduate levels and, constant awareness of high medical ethics.

At the present time there are over 15,000 living members in over 45 undergraduate chapters and 40 graduate clubs located throughout the country. Phi D.E. has the most active alumni group in Medicine since most of our members remain active after graduation to assist and guide our undergraduates. The graduate clubs serve a two-fold purpose: they act as a source of academic and spiritual support for the undergraduates and offer everwidening medical and social opportunities for our members.

Phi D.E. is also proud of its annual lectureship program which is sponsored by each of the chapters, and features an outstanding personality in the field of Medicine.
Alpha Omega, National Dental Fraternity, was founded at the Philadelphia College of Dental Surgery in 1907. Alpha Beta Chapter was established at the Medical College of Virginia in 1928.

Delta Sigma Delta Fraternity is the oldest professional dental fraternity. It was founded at Michigan in 1882. The membership of this fraternity is an honored one which includes the past president of the American Dental Association, a former Supreme Grand Master of the fraternity.

The object of the fraternity is "...to keep high the standards of dentistry by inculcating in the minds of dental students and practitioners a spirit of fraternal cooperation toward scientific, ethical, and professional progress."

Omicron Omicron chapter of Delta Sigma Delta was founded at the Medical College of Virginia in 1923. The chapter is presently located in a two story brick home at 2806 Idlewood Avenue. The fraternity house has accommodations for members, rooms for meetings, and a basement room for socials. The house will be the scene for an Eastern Regional Conclave of Delta Sigma Delta to be held in Richmond this spring with Omicron Omicron chapter as the host chapter. Delegates will represent schools along the eastern seaboard from North Carolina to Massachusetts.
Phi Delta Chi was established in 1879 at the University of Michigan for the purpose of promoting interest in Pharmacy and Chemistry. It was instrumental in the founding of Rho Chi, the national honorary scholastic fraternity of pharmacy.

Alpha Delta Chapter was founded here in 1925. The basic beliefs of the chapter are the same today as when it was founded. For most students, joining a fraternity is not only desirable but highly recommended, as it gives them a better chance for over-all personal development. It tends to instill a spirit of cooperation, improve loyalty to the college, and teaches them how to live better with their fellow students. It gives one a feeling of belonging and a sense of being depended upon.

As well as the rush parties and formal banquet, the chapter has worthwhile community projects. One of these is a Christmas project in which the less fortunate children in the hospital are provided with toys. Efforts such as this are possible because of the brotherhood spirit of the fraternity.

Pledging a fraternity gives a person responsibility and the opportunity to make decisions which are important in the maturing and character development of every man.

One of the most important benefits of belonging to the fraternity is the feeling of brotherhood.

This chapter would like to remember a brother, Robert C. Gladden, who passed away November 7, 1963.
Psi Omega

Dentistry’s largest national fraternity was launched at the Baltimore College of Dental Surgery in 1892, and since then alumni and our nation’s dental schools have accepted and proliferated Psi Omega into Dentistry’s best.

Men in dentistry have chosen their life’s work and Psi Omega does not divert from this but augments it by the establishment of professional fellowship and pride in the individual through its meetings, projects, parties, and every fraternity activity to further instill concern and incentive in the Dental Profession.

The object of Psi Omega quoted from our constitution.

“The object of the fraternity shall be to cultivate the social qualities of its members; to surround each member with friends to whom he can turn for advice and assistance when needed; to secure by cooperation benefits and advantages out of individual reach; by means of a journal to keep its member in touch with other members in all parts of the world; to assist its members in all their laudable undertakings; and to exert its influence untiringly for the advancement of the Dental Profession, in methods of teaching, of practice, and of jurisprudence.”

Psi Omega is a service to, and a fraternal find among its members and is not a political organization. At MCV our local chapter, “Gamma Omicron,” particularly proud of its members and their attitudes, not only is highly professional in its structure and execution but has been “known” to enjoy a party. Each meetings is distinguished by speakers who are also available for informal discussions. Not to be forgotten are the “Psi Omega Wives” whom our local chapter is also quite proud of. The wives have their own meetings and elections and each Christmas provide clothes, food, and toys for some Richmond family.

We have pride also in this year’s pledges and may they perpetuate the intangible factors that supplement the “D.D.S.” Degree and are such an integral part of the betterment of the Dental Profession.

Kappa Epsilon

Kappa Epsilon, founded at the State University of Iowa on May 13, 1921, is a national professional fraternity for women students in pharmacy, confining its membership to this specific professional field.

The purpose of Kappa Epsilon is to unite women students in pharmacy, to cooperate with the faculties of the colleges where chapters are established; to stimulate in its members a desire for high scholarship, to foster a professional consciousness, and to provide a bond of lasting loyalty, interest and friendship.

At present there are twenty-eight chapters in the United States, with Tau Chapter being organized on March 20, 1953. Kappa Epsilon at MCV succeeds Phi Gamma Epsilon, a local sorority founded in 1945.

Each year finds Tau Chapter and its members engaged in many different endeavors — work, study, and ???. This year brought us back with many new plans and ideas. Kappa Epsilon started off the year in Italian style with a pizza party in early November for all girls in pharmacy.

In mid-December the costume was switched as Tau helped play Santa to children in MCV hospitals. How can we forget wandering around completely amazed and fascinated by “toyland” in Richmond stores.

January and the New Year brought rush season with its usual parties, etc., ending with the welcoming of the new pledges, followed by an impressive pledge initiation. The culmination of the pledge period came in March when members again switched costumes — this time to Halloween “witches” (or so pledges seem to think.) This week ended with informal initiation (only an impressive title). Somehow the members seemed to get the worst end of the deal, however. The final step — formal initiation — followed later. It is a step worth the struggle and waiting.

This year found Tau members involved in many new and different situations, bringing out the best (or worst) in all of us at times. First quarter it became a rare oddity for the seniors to have a class. Those 8:00 classes were the worst — as two sleepy-eyed members walked around during those early hours.

One member found that housekeeping and cooking were not always spicy (wonder how many times “pork-chop casserole” was served?).

Hobbies of our members can certainly prove to be interesting. McRae Hall has been turned into a small scale knitting factory — one room in particular. During knitting breaks we enjoyed the “uke” played by one member. All kidding aside, studying did come sometime — especially for first quarter Juniors (ALL THE TIME!).

Throughout the year we enjoyed the visits of many “alums.” It is not only possible but highly probable that one member could sleep through one such visit.

Throughout the years Kappa Epsilon has given its members unity and friendship with each other, which will continue for many years.
Is this the way to study?  Industrious seniors!

Kappa Psi Pharmaceutical Fraternity was founded at the Russell Military Academy in New Haven, Connecticut, May 30, 1879, by F. Harvey Smith. The first collegiate chapter was that of Delta at the University of Maryland on November 18, 1889. Beta Chapter was chartered in 1900 at the University College of Medicine in Richmond, Virginia; it was the fourth collegiate chapter formed. On March 19, 1904, Theta Chapter was installed at the Medical College of Virginia as the eighth collegiate chapter. In 1913, when the UCM merged with MCV, Theta Chapter remained as the active chapter of Kappa Psi.

In 1903, Kappa Psi was incorporated as a national fraternity for both medical and pharmacy students. In 1924, there was a division and the medical branch became "Theta Kappa Psi." Theta Chapter at MCV has long been a leader in Kappa Psi.

A professional fraternity offers the chance for men that will be working together after graduation to build up bonds that will last throughout life. We, as Brothers in Kappa Psi, endeavor to develop men with a finer sense of values and to encourage scholarship, integrity, leadership, and service. We attempt to broaden outside interests through extra-curricular activities and to increase social poise as we maintain a professional spirit.

The privilege of membership in Kappa Psi carries with it certain responsibilities, such as responsibilities to the fraternity, to brotherhood, to the college, to fellow students, and to the profession. We believe that men who assume these responsibilities will make a greater contribution to pharmacy and to the society in which we live.

This year Kappa Psi had sixteen active brothers, but, though few in number for most of the year, Theta Chapter functioned with 100% effort from each Brother. We are certainly proud of the twenty-one pledges which came into Theta Chapter this year, and we hope to increase our number by a greater extent next year.

Whether socially, academically, or with leadership, Kappa Psi is prominent in the School of Pharmacy.

The School of Medicine Class of 1964 dedicate this portion of our annual to Dr. Richard Egdahl, whose vitality, keenness of mind, storehouse of knowledge, quickness of smile, and enthusiasm for teaching have served us as an inspiration during these last four years.
A little less than four years ago, eighty-four young men embarked on the longest and most difficult journey of their lives... a journey that has no end. A journey that had its beginning in man's first attempt to aid his fellow man. A journey known as the study of Medicine.

With each year to follow, we passed another milestone. With the coming of our fourth milestone, we can truly see the end of the beginning. Out of our perseverance of the past and the knowledge we have accumulated, we are ready for the future. We face the final and most important phase of our journey, the practice of medicine, with full faith in our ability and reverence for our task.

"I went to medicine because I wished to live deliberately, to front only the essential facts of life, and see if I could not learn what it had to teach; and not, when I came to die, discover that I had not lived."

In Memoriam

Walter O. Rinko
July 26, 1936 - July 24, 1963

It is with deepest sympathy that we, the Class of 1966, pay our farewell respects to Walter, our Friend, classmate, and colleague. With his passing, we have lost a true friend, MCV has lost an excellent student, and the profession has lost a great asset.

It is with great appreciation and sincerity that we, The Senior Dental Class of 1964, dedicate our portion of The X-Ray to Dr. F. B. Wiebusch, not only for his patience and guidance, but also for his high standards of excellence and dedication to the profession of Dentistry.
It seems but a short time past that a group of some eighty strangers began a common journey into dentistry, each with his enormous pride, each with his unshakable confidence, each with his fantastic ignorance. Now, most of these eighty are about to complete their formal dental education. The enormous pride remains, but the confidence has been shaken, and the ignorance has been converted into a foundation upon which a lifetime of learning and service may be built.

It hasn't been easy! Harder for some than for others, but each has chalked up many long hours of coffee, sweat, and cigarettes.

Freshman year was unbelievable. No one could possibly learn that in a lifetime, much less one year. But, we made it.

Then came sophomore year. Everybody knows that sophomores don't have to study; that is, until they get half way through the year and find out that there is an exam in each one of these 'crib' courses.

The transition between sophomore and junior years is quite drastic. We are impressed with the fact that Dental School is not a country club, and that d-bittered yeast is an excellent source of the B-complex vitamins. And, armed with this essential knowledge and the added information that if your 'waller bath' is too warm your 'glutta-percha' has too much 'soft-givy' and you can't 'finalize' your impressions, we advanced headlong into the ultimate goal of our journey, the senior year.

Overnight we were transformed from the unknowing, uninformed juniors into the expert of all techniques, who has nothing more to learn, but must bide his time and put up with the situation at hand until that wonderful moment when the title of Doctor is bestowed upon his swelled head. That moment when each of us must realize that the past four years of worry, study, and just plain hard, sometimes exhausting, work was surely worth the effort.

But then, it wasn't all hard work. Each has his own pleasant memories of good fellowships at parties and coffee breaks, and of self-satisfaction when a job was well done.

All of these things will certainly be a part of each and every one of us for the remainder of our lives and we want to express our appreciation for the opportunity of having enjoyed them and endured them.

School of Pharmacy
With deep admiration and appreciation, we, the Pharmacy Class of 1964, are proud to honor a woman who through her efforts and encouragement has given to the students a feeling of warmth and friendliness. We want her to be remembered by all. For this reason, we dedicate our portion of The X-Ray to her, Mrs. Charlotte Yates Harris.
In mass we number twenty-five, one of us being an instructor, who will also leave with us this year, making us the smallest graduating class from the School of Pharmacy in recent years. Nevertheless, this minute group certainly has not retarded the progress of this fine institution.

We are as the transition, elements, being at a higher energy level than any class before us, as we are the first finished products of the New Frontier of Pharmacy, the five year program.

The feat of becoming pharmacists was by no means an easy task. It took years of hard work and in most cases, many, many years. However, this amazing feat was accomplished only through the painstaking efforts of Dr. Neuroth and other members of his Pharmacy Department. We really had a struggle on our hands, but somehow we managed to overcome it.

Valuable information and knowledge has been placed in our heads in the last years. Dr. Lowenthal taught us how to remove a label in "sistine" easy lessons. In learning the History of Pharmacy, we were told, not until 1539, when Tragus named it and hired peasants in Europe to cultivate it did we know anything about it. It came to this country in 1776, the year of our liberation, and not until recent times have we been able to discover the real use of it. It has been found to cause symptoms of schizophrenia in adult pigeons. What is it? Digitalis, the wonder drug of Pharmacy! Dr. Neuroth also taught Pharmacognosy, a very mysterious course, since our quizzes were never returned. Dr. Andrako taught us MCV's first Inorganic-Organic Medicinal Course. We also picked up the pearls from that very didactic man, Russ Fiske, the one and only certified public pharmacist. The outstanding information was acquired in Physical Pharmacy taught by Dr. Simonelli. We learned about entropy and enthalpy so we could converse with physicians while we were interpreting the graphs in the literature. There was knowledge acquired in extra sessions that began every time a student walked within fifty yards of McGuire Hall.

We have been called, by Dr. Simonelli, the best class that he has ever had the pleasure to teach and we find it hard to believe. But, we accept it since one can not turn down a compliment, even one as great as this.

We have been exposed to all phases of Pharmacy, and have learned that anything is possible in MCV's School of Pharmacy!

School of Nursing
Dedicated to our parents, who have sacrificed for our benefit by:

1.) Relieving symptoms of disappointment, fatigue, and malnutrition.
2.) Combating infections of anxiety, discouragement, and homesickness.
3.) Conserving our strength through their thoughtfulness, encouragement, and understanding.

We, as nurses, look with gratitude to our parents, who have supported us throughout these four years at MCV.
Time passes and graduation is almost upon us. It seems an eternity and yet just yesterday that we were welcomed as freshmen to the Medical College of Virginia. During our sophomore year it was frequently stressed to us that we should never forget to measure the intake and output of our patients. It seems appropriate at this time that we should stop and attempt to measure the intake and output of thirty-eight young women who claim the title of "nurse." Yet this seems quite an insurmountable task—tallying these past four years. Much energy and effort have been spent and recorded (progress reports?), often resulting in tears, disappointment, grumbling and threats; but there were also times of great satisfaction and happiness. Many times we stopped—questioning ourselves in moments of doubt. Just why did we want to enter this profession of nursing? The majority of our class answered that they wanted to be involved in the great joy that comes from service to our fellowman. We have learned and are still learning what it is to give of one's self.

These four years have also been years of great personal growth for all of us. We have been told that maturity is indeed an individual matter, but each has attained a greater understanding of herself as well as of others and is one step further toward the realization of her role as a professional person.

Today again, as if freshmen, we are welcomed to new horizons much broader and wider than we ever expected. It is our own hope that even as we have just begun to realize our individual potential, we will continue to grow and improve as nurses and people. We will look back with fondness on our days spent at MCV, and remember the discoveries we made and the guidance we found. Truly, the principles, ideals, and philosophy we polished here, will give us strength to live by in future years.

Dinner is a time to relax and discuss the day’s events.
We, the 1964 Graduates of the Associate Degree Program, dedicate our section of The X-Ray to you, Louise D. Bryant, with the following quotation:

"The only way in which one human being can properly attempt to influence another is to encourage him to think for himself."

Leslie Stephen

We sincerely thank you for all the understanding and guidance you have shown us; the memory of your instruction and friendship shall remain with us forever.
As freshmen, we used to sing, "O, Sophomores, O, Sophomores, how we envy you! In two short years there's an awful lot you have learned to do." And now, it hardly seems possible that two years have passed since we entered MCV to begin our study toward a career in nursing.

How well we remember that first arrival in September of our freshman year! MCV and Cabaniss Hall looked so big, yet so promising.

Our first few weeks away from home were filled with the excitement of meeting new friends and teachers; new classes; and locating the boys' dormitories. But the most exciting moment of our freshman year was the day our caps and uniforms arrived, for this marked the beginning of that long awaited goal. We wore them proudly as we watched the envious look of the B. S. freshmen, yet felt quite inadequate as we set out to explore the hospital and give patient care. But our instructors took care of that. We were soon burning the midnight oil as we labored over anatomy, chemistry, microbiology, Fundamentals of Nursing, Medical-Surgical Nursing, English, psychology. We gradually learned more and more and found that we continued to move toward our goal very rapidly.

Our first year of Med-Surg soon ended, and we entered the operating room during the third quarter. We spent many a week-end trying to learn the difference between a hemostat and a Kelly, only to confuse them as we went to hand one to a surgeon.

With shattered nerves from surgery we ended our freshman year with the passing of exams and the pinning of our "Big Sisters" who were ready to graduate. We also honored them with a "Breakfast." They looked so nice in their new white caps and we envied them, but we knew they had worked hard for what they had achieved.

After a ten-day spring vacation, we returned to MCV for our summer session. We looked forward to it, for we entered one of the four specialties—Pediatrics, Obstetrics, Psychiatry, or Advanced Medical-Surgical Nursing, and we also left Cabaniss and moved into Randolph-Minor Hall. In spite of Richmond's summer heat, we survived, went home for a rest, and returned in the fall to begin that long awaited Sophomore year. It officially began when we got our caps with the black bands. How proud we were! We continued to study hard as we continued our specialties and improved our skills. We had a lot of fun that year, too. We surprised our "Little Sisters" with a Halloween party, and brought in the Christmas spirit with a party around the decorated tree in Cabaniss Hall. Afterwards we went caroling in the hospital.

Our sophomore year continued, and for the first time, our increasing knowledge fell into an organized pattern. We found a new approach to nursing problems and disease, and we began to function like professional nurses. As we looked back on our first year, we could remember that little song we sang to the sophomores last year. It ended with, . . . In two short year, we hope we will be, like you, proud graduates of MCV." And it has come to an end like that for us. We have reached that final goal—we have become nurses!

We, the Physical Therapy Class of 1964, dedicate our section of the yearbook to Mr. Carlton Jones, a warm friend and an inspiring teacher. As we enter the field of Physical Therapy we shall remember him for his patience, understanding, and dedication to the profession.
The date was September, 1962. Fourteen girls and five fellows reported for duty aboard the PT '64. The recruits were indoctrinated by the Skipper, who had the unenviable duty of making seasoned sailors from raw material. In no time the crew was confronted with its major battles in the first tour of duty. The Skipper commanded the Battle of Anatomy, while the Battle of Physics was a series of skirmishes with members of the crew assisting one another. Many times during this first tour of duty we anxiously grasped life lines to avoid sinking into the sea.

Occasionally during the junior grade year, the crew used week-end passes to let off steam. The first such event found the crew celebrating Halloween night at the Halberstadt's. Many facets of personality, previously untapped in the classroom, were unveiled that memorable evening.

The crew soon became accustomed to sitting many broadening hours, trying to fill their minds with a vast, never ceasing onslaught of material. For now, we knew that we were expected to strive for understanding, not memorization. "Remember: if you can't explain it, you don't understand it." These words became implanted on our souls.

In no time we were due for extended leaves for the Thanksgiving and Christmas holidays. Christmas vacation almost seemed like a reprieve after that first big anatomy exam. Before leaving for our Christmas vacation, both crews participated in traditional caroling for the patients in Memorial Hospital.

After Christmas our next extended leave was several months away. At times when the ship became too confining we took short jaunts to D.C. to see the Mona Lisa and to Georgia to visit families and friends. Some crew members used their passes for other types of entertainment. No matter how differently the passes were used, we always found ourselves together during the week, sharing struggles and triumphs.

In June, the fresh recruits ended their first tour of duty. The final maneuver was the feared questioning by the Skipper and it was every man for himself. To our amazement, that final oral exam was not as traumatic as the anticipation.

Six weeks basic training was scheduled for the summer and it found the crew scattered to various hospitals. At long last we set about doing the things that made the last year more than worthwhile. We used the knowledge attained previously; we learned more in the clinic; and we came to anticipate our next tour of duty. In September, we returned fourteen strong, with experience behind us and another full year of study, fun, and fellowship ahead.

It was during this senior grade year that we learned to cope with frogs, rats, turtles, and a German accent. We took turns electrocuting each other and analyzing each others' abnormalities. We became conscious of our pronated feet and bowed legs; we scrutinized curiously anyone who happened to pass by.

Four times during the year we went out on clinical assignments—as far as D.C. These experiences were anticipated eagerly, especially.

When June arrived, no one believed that two years had passed. Once again the summer brings separation of the crew, and when we meet again in the fall, this time we will become Registered Physical Therapists in our own right.

Administration
The Class of 1964, wishes to honor Dr. Edwin F. Rosinski in the dedication of our section of this yearbook. His patient counseling, spirit of helpfulness, and, above all, the challenge he provided us are acknowledged with gratitude. We salute Dr. Rosinski for his obvious delight in teaching and his keen sense of humor. We have been enriched by association with him.
After letters of reference, personal interviews, and transcripts, we were selected as those whose character, ability, and personality best assured a contribution to the field of hospital administration. And yet, as we have stepped from all walks of life to prepare ourselves as hospital administrators, we have found that our concepts of hospital administration were nebulous. There was much to learn. Thus with a deep desire to attain this goal we have set our sights toward the completion of the didactic and residency phases of the program.

The philosophy of our program is to develop concepts of the professional hospital administrator as the link between the governing body and the people who provide actual patient care or services—physicians, nurses, and countless others.

In the words of Robert Hudgens, director of the School of Hospital Administration: "The school cannot hope to teach answers. Each administrator must ultimately find his own answers to his peculiar problems. The school can only bring the student into the environment of the modern hospital and introduce him to the organization and purposes of hospitals, and management methods and philosophy which have been fundamental."

The Class of 1964, earnestly hopes each man will measure up to the responsibilities of a truly challenging profession. We shall look back on these past two years as ones in which we learned not only the fundamentals of hospital administration, but also the ideals and philosophy that will make us compassionate and understanding in our care of those who come to hospitals seeking care.

Technology
Dedicated to Sue Worsham, Instructor of Medical Technology.

Given all the gold words
That polished tongues can say,
They could not tell the story on
Our Graduation Day.

They could not speak our gratitude
For all your thoughtful care
Reflected lightly in the smiles
Bestowed while you are there.

Or give our thanks for every way
That you have been so kind,
With unselfish direction in
A manner most benign.

The knowledge you have brought to us
And given so earnestly,
To fashion all our futures in
A profession with prosperity.

We know not how to thank you, Sue,
But with our smiles and tears
We dedicate our works and deeds for this our final year.
Daniel Webster once said: “Knowledge does not comprise all which is contained in the large term of education. The feelings are to be disciplined; the passions are to be restrained; true and worthy motives are to be inspired; a profound religious feeling is to be instilled, and pure morality inculcated under all circumstances. All this is comprised in education.” This also applies to the School of Medical Technology. For it is here, in our last year of education, that we have learned the importance of of self-discipline, restrained passion, and true and worthy motives.

The months of this college year have been varied and full. Each has brought to us special events, hopes, expectations, and perhaps even disappointments. It began on that first day in September, when we awaited our orientation with anticipation and apprehension. During the weeks which followed, classes became well-organized, and we soon learned what was expected of us.

Perhaps among those incidents which will stand out most in our minds and hearts, will be our first days of “sticking.” The empty, shallow feeling we felt throughout our bodies—especially our stomachs! Our nerves were tense but efforts were made not to show how really nervous we were. The hours between 10:30 a.m. and 12:00 p.m.—listening for that special phone call, wondering who would be returning at lunch, appreciating a kind word or smile from one patient that helped us look forward to another day. These few moments as well as many others—test days, surprise parties, fifteen minute breaks in the lounge, dropping our tubes just before taking our final reading, the mosenthal test—these became misty recollections imprinted on a happy mind Graduation Day. The day did not differ from many other ones, yet its date will not be forgotten. Yes, another chapter in our lives was closed—but not really closed, because it also opened a new door to the life ahead.

In deepest appreciation of your untiring efforts in our behalf and with the awareness of the sacrifices you have made, we the Graduate Students dedicate our part of the 1964 X-Ray to you, Miss Majorie D. Kratz.
The Graduate School

The School of Graduate Studies was formally organized in 1957, although opportunities for graduate work had been available since 1934.

The function of the graduate studies program is to train young, aspiring, and well-gifted students of science who show promise as teachers and research workers — to guide young, inexperienced but inquisitive minds properly by well experienced advisors to serve the demands of modern scientific research.

The students admitted in this school are exposed to various seminars and conferences along with adequate course work which they take at this institution and other universities. They carry their highly specialized and individualized research works under the guidance of their own advisors.

What is MCV?
We have tried to tell you by showing you her heart and hands . . . her people . . .
If we have pictured a memory, reflected a mood . . . then we have succeeded in capturing a bit of the dream and reality on paper.

And, if we have succeeded, a large amount of the credit goes to Mr. Lester Peterson of Taylor Publishing Company, who took our vague ideas and showed us how to polish them and put them on paper. Another slice goes to Janice McDaniel, photography editor, who juggled schedules and chased down photographers. Credit also falls on the shoulders of all the section editors.

And, if we have succeeded, credit goes to you the Student Body for the cooperation and support you have given us.

THE EDITORS
Advertisements
At hospitals and medical outposts a long way from the classroom, medical students learn to cope with unfamiliar diseases; help to provide much-needed medical services to people in underdeveloped areas of the world; and contribute to international understanding and good will.

This unusual opportunity to work and study in foreign countries is offered to students through the Foreign Fellowships Program of Smith Kline & French Laboratories. Administered by the Association of American Medical Colleges, the program has enabled 123 students to work in 40 different countries during the past four years. Junior and senior medical students are eligible to apply for Fellowships, which provide for an average of 12 weeks' work abroad to be completed before internship.

Students who are interested in Fellowships should apply through the deans of their schools.

Q.
Is this dentist

( ) Educating the patient?
( ) Demonstrating his professional skill and knowledge?
( ) Putting the patient's fears at rest?
( ) Taking the first step toward easy and accurate tooth color selection?

A. ALL FOUR!

The Blend Selector for Trubyte Bioblend is a unique patient education aid as well as a prosthetic aid. Your patients will quickly recognize the personalized denture service it makes possible. Show a patient how natural her denture smile can be, and you remove many of the psychological obstacles to the denture experience. And when you use the Blend Selector to evaluate the patient's tooth color requirements, you take the first and most important step toward final success of the esthetic restoration.

Peoples

5,647,729 prescriptions! That's the number filled last year by all Peoples Drug Stores, an increase of 595,476 over 1962. Impressive figure, impressive public confidence . . . because behind all prescribed medicine at Peoples is confidence—in the physician who prescribes it, the manufacturer who makes it, the pharmacist who fills the prescription. We are proud to share this confidence with physician and drug manufacturer. At Peoples, nothing is so important as prescriptions!

PICTURE ACKNOWLEDGMENTS

The X-Ray would like to thank the following photographers for the time and effort they put into this book: Ted Partlow, Walter Padow, Mr. Alexander of Colonna Studios, and David Kessel. We would also like to thank the Richmond News-Leader and Times-Dispatch for permission to use the pictures on pages 2, 3, and 117.
